Guarding Your Most Valuable Asset, “Employee Health”

In line with the UAE’s Occupational Health and Safety Management System (OHSMS) National Standard, our medical surveillance program serves as a proactive guardian of your team’s health.

Targeted at industries with potential exposure to occupational hazards,¹ we offer periodic laboratorial screenings to detect and manage health risks, ensuring your workforce remains robust and your operations are resilient.

Ensuring Occupational Health with Comprehensive Medical Surveillance 7

In-depth Respiratory Health Screening: 01

Protecting respiratory health is paramount. Our extensive panel of tests, including the Pneumonia panel and mycobacterial testing with PCR and GeneXpert, identifies infectious and inflammatory conditions, safeguarding against bacterial, viral, or fungal agents.²

Liver Function: A Marker of Systemic Health 02

The liver’s multifaceted role in the body’s detoxification necessitates comprehensive monitoring.

Our liver function tests, including:

- Alanine aminotransferase (ALT)
- Aspartate aminotransferase (AST)
- Alkaline phosphatase (ALP)
- Gamma-glutamyl transferase (GGT)

+more

Offering a window into hepatic health, aiding in the formation of differential diagnoses.³

Uncompromising Detection Against Lead Toxicity 03

Our lead toxicity screening utilizes whole blood and urine samples to precisely measure lead levels, a critical step in preventing occupational lead exposure.⁴

Vigilance Against Silicosis 04

Routine analysis of sputum and bronchioalveolar lavage samples helps detect critical conditions like tuberculosis, while occasional lung biopsies confirm diagnoses, ensuring the pulmonary safety of your workforce.⁵
